“What You Should Know If You Have Been Involved In A Car Accident”

- Should I settle my case?
- Warning Symptoms
- What specialist do I need to see?
- When is appropriate to seek legal advice?

Dear Neighbor,

Did you know one of the most stressful aspects of living in modern life is dealing with the problems that arise after an auto accident?

Were you also aware that some auto accident injuries are hidden and seldom detected for months or even years?

As a result, a lot of accident victims settle their case with the insurance companies before getting evaluated from a Doctor trained in soft tissue injuries.

This Could Be A Big Mistake.

Why? Because once you settle your case you lose the right for care if you need it.

A good rule of thumb is to get educated in your rights, and then make a decision.

There is no reason to rush; it can only hurt you.

It is our position that if you were indeed injured, you should get the care you need to get you back to the way you felt and functioned just before the accident.

Even if you are just sore, you should get checked out immediately.

Why? Because you may experience pain, numbness, headaches, muscle stiffness, fatigue, and other problems including arthritis many months down the road.

Remember that **nothing is more important than your health** when you start to lose it.

Here's where the problem begins...Most people who suffer from an auto accidents have one thing on their mind: **Their Automobile!**

Common questions include:

"Who is going to fix my car?"

"What will I drive in the meantime?"

"Will my insurance rates go up?"

"Who is going to pay for it?"

Aim High Chiropractic 945 S Federal Blvd Denver, CO 80219 (303) 922-8146

And the last thing on their mind is:

"Am I Really O.K.?"

Warning Signs

Not only are auto accidents an inconvenience and a hassle, a common general complaint of auto accident victims is that they don't feel their normal self.

If you are experiencing any of these symptoms, you may be suffering from a hidden or soft tissue injury...

- **Muscle Stiffness**
- **Spasms**
- **Neck Pain**
- **Headaches**
- **Numbness and Tingling**
- **Mid/ Low Back Pain**
- **Difficulty Sleeping**
- **Irritability**
- **Memory Loss**
- **Fatigue**
- **Difficulty Concentrating**
- **Dizziness**
- **Stiffness**
- **Or you may be injured and feel nothing at all...yet...**

Did you know that auto accidents may initiate posttraumatic osteoarthritis?

Osteoarthritis can ruin your posture (giving you slumped or hump back appearance).

Osteoarthritis can cause the discs in your spine to degenerate and create scar tissue formation leading to chronic stiffness and the inability to move properly.

When this happens, simple tasks like turning your neck become painful and almost impossible.

Most Doctors Are Not Trained In The Detection Of These Hidden Injuries...

How are these hidden injuries detected?

If you have been in an auto accident, you need a doctor that is trained in the biomechanics of the human body; someone who treats these injuries every day.

That means that he or she can perform orthopedic and neurological tests as well as other functional tests that can assess soft tissue damage, muscle strength, range of motion, and joint and nerve function.

In addition, x-rays can be taken to find out if there has been any structural damage.

Hello, our names are Dr. Conrad Bui and Dr Scott Brown D.C, our office has been treating Auto Accident patients for many years now.

We evaluate auto accident victims, and make any appropriate referrals to other health care providers if needed; including orthopedic doctors, neurologists, physical therapists, acupuncturists, massage therapists, and MRI centers.

Our Primary Responsibility Is Giving You The Care If You Need It, And Submitting The Required Medical Reports To The Insurance Company So Your Rights Are Protected.

Unfortunately, there are people who seek treatment, who are not injured, for the sake of financial gain. If you are one of those people, **please do not call our office.**

Aim High Chiropractic 945 S Federal Blvd Denver, CO 80219 (303) 922-8146

There are also people who are injured who aren't getting the care they need. If you are injured, call us, **WE CAN HELP YOU.**

And if we can't help you we will refer you to a Doctor or facility that can.

Your rights are protected and your injuries are properly documented.

If you have been in an auto accident recently, there are some important decisions you have to make and if I were you, I'd make these decisions very carefully.

Q: Should I See An Attorney Before I See a Chiropractor?

A: It is important to get checked out by the doctor first, that way the findings from your exam will allow you the information you need in order to decide if an attorney is necessary. If necessary, we can refer you to a reputable and qualified attorney.

Q: What If My Car Sustained Only Minor Damage?

A: Documented studies done by Charles Carroll, M.D., Paul McAtee, M.D. and Lee Riley, M.D. revealed that:

"The amount of damage to the automobile bears little relation to the force applied to the cervical spine (neck) of the occupants."

In other words, the damage to the passengers is not necessarily directly related to the damage to the vehicle. But if you aren't in any pain then you may be O.K.

But it's probably wise to wait a couple weeks after your injury before you settle your case. If by that time you're still feeling fine, then go from there.

Q: If I Need Treatment For This Injury, Do I Have To Pay For It Myself?

A: Recent changes in auto insurance laws have made dealing with insurance companies very confusing if you have been hurt in an accident. The good news is my office will handle everything for you. My staff has been extensively trained in the recent law changes and we will call the insurance company and submit all the necessary paperwork for you.

Q: The Insurance Company Has Been Calling Me And Wants To Settle, What Should I Do?

A: Do not sign or settle until you have had us evaluate your injury for you. If you settle before your injury is fully resolved, you will be completely on your own and will have to pay out of pocket for your care.

Q: I've Been To The Hospital And My Medical Doctor, Do I Really Need to See a Chiropractor?

A: You need a doctor that focuses in the treatment and diagnosis of auto accident injuries. Usually hospitals will check vital signs, and release the patient with pain relief medication. They normally do not treat the underlying improper musculoskeletal biomechanics that can, and often do, lead to future pain. If you are still having problems, you should get a second opinion.

If your M.D. has given you pills, you must understand that pills do not correct structural or soft tissue damage. There are special therapies designed for that, and we offer these modalities at our office.

Q: Does Your Care Hurt?

A: Absolutely not. The care is very gentle and quite soothing. Most patients can hardly wait to get their care.

Q: Is The Care Safe?

A: Yes, extremely. Particularly when compared to the side effects from all medication.

Dr. Conrad Bui D.C & Dr. Scott Brown D.C

To get a quick evaluation call the office with in the next month to receive a **NO COST INITIAL EXAM & CONSULTATION.**

The office is located on Federal Blvd and Mississippi.

If you work late, you can come in up to 7 p.m. and we are also open on Saturday for your convenience.

Our Patients Speak....

“When I had a car accident, I chose Dr. Bui. The results were excellent, and now I refer friends, family and clients to them.”

-Craig Mercer, Attorney, Denver

“After my car accident, my back hurt so much that I could barely lift anything over ten pounds and it was heartbreaking that I couldn’t carry my newborn baby. After two weeks of treatment my pain was gone. It’s a miracle.”-- Shielah Davis, Denver CO

“I had a severe car accident about three months ago. I felt terrible, tired and had headaches, low back pain and neck pain. I lost my appetite and had a hard time sleeping at night. ... I went to a different chiropractor and it did not help. A friend told me to come here and give it a try.... The doctor here was so nice and cared a lot about my health. In less than one month I started to feel better! My headaches are all gone and I can take care of my family again. I am so thankful to this office. The staff here is friendly and always greets me with a big SMILE!”-Hoa Nguyen, Denver

“After my car accident I was very sore and had headaches. After seeing a regular doctor and being told there was nothing wrong with me, I thought I would have to live with this pain for the rest of my life. A friend of mine told me the many benefits of chiropractic and referred me to Dr. Bui. Within a week my headache were completely gone, my sores had diminished, and I even feel my posture getting better. The doctor and staff are friendly and make every visit enjoyable. I highly recommend this service to anyone.” - Sharlene Perea, Denver
